

Exercise 6.2

Standards-Referenced Reporting

The following questions address much of the important content addressed thus far. Use figure 6.1 (pages 115–117) to answer each question, and then compare your answers with those provided on the corresponding answer sheet.

1. Show how the student received an average score of 2.70 for working in groups.
2. Show how the student received an average score of 3.10 for social studies.
3. Identify the topic or topics for which the student exhibited the most gain over the grading period.
4. Identify the topic or topics for which the student showed the least gain over the grading period.
